412 (*eché*), hoe (*asron*), machete (*machit*), coa (*luk*), and digging stick (*avutel*). In a 243 few towns (Amatenango), where lands are [409] flat, the plow is made of wood and pulled by oxen but only for wheat farming. During [415] corn planting, the seed is carried by the [824] planter in a *morral* hung from the shoulder, [237] in a gourd with a large spout, or in containers made of armadillo shells. The harvested crops are placed in deep baskets, made of reed-grass, or in big pita (*chojak*) [412] net bags. The ear of corn is cleared of its [237] husk by a sharp bone or a small deer horn.

322 The axe, machete, and knife are used in 412 wood working, which is very rudimentary, though handsaw and hammer have a place. With these tools the Indians make doors, tables, seats, small benches, shelves. Blom [534] and LaFarge (1926–27, 2:351) add that the Tzeltal near Ocosingo also make violins of a shape similar to the European type, but they have no resonance and poor tone. They also manufacture pipes and combs roughly [463] finished. No village of this group has specialists in carpentry to compare with the Chamulas (Tzotzil-speaking), who supply furniture at low cost to San Cristobal de las Casas and other places of the area.

324 Stone carving requires a pickaxe with 412 one end very sharp, the other very flat to serve as a hammer, and a short wooden handle. This is the tool used in Tenejapa for making metates. These metates have three legs, but Blom and LaFarge (1926–27, 2:338) mention metates without legs (Ocosingo municipio) which are made of volcanic stone found along the San Martin River. According to the Tzeltal of Oxchuc, the name of the metate is *chá*, its handle *kab-chá*.

412 An iron bar to break the ground, an axe, and a machete are the tools for building huts, chickencoops, sweat houses, and other small structures.

283 Another tool, used in the making of pita 413 rope, is *karet*, which probably comes from the Spanish *carreta*. It consists of a wooden disc fixed to a tree trunk that is nailed to
